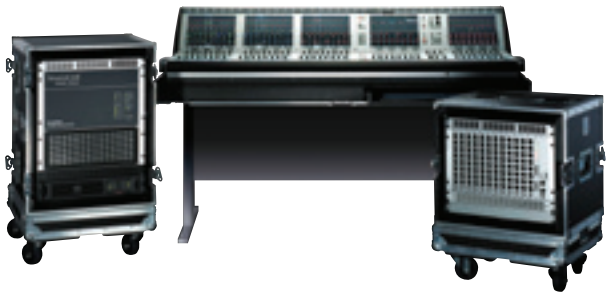
Vi6



Soundcraft's flagship large-format digital mixing console. Vistonics™ II user interface with FaderGlow™ fader function display. Touch-screen colour TFT monitor screens with integral rotary controls and switches mounted in the glass. 96 mono inputs into 35 outputs. Pairs of mono inputs can be linked to create stereo channels. 24 insert send/return pairs can be configured and assigned to any of the 96 inputs or 35 outputs. All 96 input channels can have direct outputs in addition to their internal bus routing. 32 Grp/Aux/Matrix, plus main LCR Mix and LR Solo busses. Connection from local rack to stagebox via standard fit Cat5 or Cat7 cable, with Amphenol RJF connectors or optional fibre optical interface card. Max distance, local rack to stagebox: 80m using flexible reel-mounted Cat5 cable, 130m using Cat7 permanent installation cable. 16 GPIO contact closure inputs and outputs on the local rack, and 8 inputs and outputs on the stagebox. One MIDI In and two MIDI Outs. Controls for Mute Group (x 4) and VCA Group (x 16) assignment. Controls for assignment of Vistonics rows to bus sends (when channel parameters are not selected to Vistonics). Snapshot automation controls. Talkback controls.

Vi4

Vi4 offers all the functionality and facilities of the Soundcraft Vi6, but in a smaller, more compact footprint more suited for space-conscious applications. In just under 1.5m/5 feet, the Soundcraft Vi4 offers access to 48 inputs on 24 faders, with a total of 27 output busses available for use as masters, groups, auxes or matrices. All other features of the Soundcraft Vi6, such as the highly acclaimed Vistonics™ II touch-screen user interface, Soundcraft FaderGlow™ fader function display and the unequalled audio quality are inherited by the Soundcraft Vi4.

Vi4 Control Surface	SCR0275	RRP: £18670.00
Vi4 Control Surface Flight Case	SCR0522	Nett: £800.00

Vi2

Soundcraft now offers a Vi Series control surface for applications where space is very tight. The new Soundcraft Vi2 inherits all the basic functionality of its larger brothers the Vi4 and Vi6, but measures just 850mm in width, around half the size of a Vi6. The Soundcraft Vi2 is equipped with one channel section of 8 input faders, and the master section which holds 12 faders. The Vi2 can handle as many inputs as a Vi4 or Vi6 (72 and 96 channels respectively) using the standard stagebox and local rack hardware, with access to 8 inputs at a time on the channel bay.

Vi1		
		
A complete standalone console package with 32 channels of analogue input to 27 analogue outputs, plus 6 digital inputs, 4 Stereo FX Returns and 6 digital outputs in one chassis. As standard, Input to mix capacity is 46chs, but by adding a stagebox (compatible with the existing Vi racks), simultaneous channel count increases to 64. Channels are routable to 24 multifunction busses, plus LR and Mono Mix busses. Up to 8 of the busses can be configured as Matrix mixes, each with up to 16 sources. The surface is just over a metre wide, and includes 16 motorised channel faders with fixed and user-definable layers, 8 output/VCA faders and 2 master faders.

Si3+

NEW

Digital console designed for live use on both touring sound systems and in fixed installations. 64 mic inputs on 32 faders, 4 stereo inputs, 24 bus outputs. 8 matrix outputs, 12 VCAs, 8 mute groups. 4-band fully parametric EQ with HF & LF filters. On board dynamics. Four independent Lexicon processors. 30 band BSS graphic EQ on every output bus. A physical output and meter for every bus. 8 analogue insert connections to allow outboard processing. All connections are on individual connectors on the rear of the console. Virtual Si software for offline setup. BNC wordclock output.

Si3+	SCR0523	RRP: £19630.00

Si2+

NEW

The Soundcraft Si2+ is a smaller partner to the Si3+ and appeals to those wanting a compact and highly-featured digital console at a competitive price. Typical uses are live sound venues, tour sound sysytems, medium-size theatres and houses of worship. The Si2+ has 64 mic inputs mapped on 24 faders, all other features are identical to the Si3. 64 mic inputs, 4 stereo inputs, 24 bus outputs. 8 matrix outputs, 12 VCAs, 8 mute groups. 4-band fully parametric EQ with high and low cut filters. On-board dynamics. Four independent Lexicon processors. A physical output and meter for every bus. 8 analogue insert connections to allow outboard processing. All connections are on individual connectors on the rear of the console. BNC wordclock output.

Si2+	SCR0522	RRP: £16680.00

Si1+

NEW

The Si1+ has 48 mic inputs mapped on 16 faders, and with four dedicated Stereo Line channels, four dedicated FX Returns from the four stereo Lexicon FX processors offering at least 48 inputs to mix from the onboard I/O. The two 64x64 channel expander slots allow the installation of further I/O bringing the available inputs to mix up to 72. The Si1+ has a very compact footprint of just 1200mm width, meaning it fits nicely into space-restricted areas. BNC wordclock output.

Si1+	SCR0522	RRP: £13725.00

BB100

Subject to separate dealership terms

Cost effective, yet fully professional, compact 8-bus audio mixing console for on-air, production, hard disc front end and transfer applications. All chassis are fitted with LB6 Aux, Master and LB4 Monitor modules, in addition to the modules listed below. Each LB2 dual group module provides 2 pannable mono groups, a stereo FX return and a cleanfeed (mix minus) master. All chassis are of the "drop through" type for furniture mounting. All consoles include a meterbridge with moving-coil VU meters and bargraph meters or the group and master outputs according to chassis size. BB100 standard configurations below are complete consoles including MPS5 or MPS10 Power Supply as required. All versions of BB100 may be part loaded. Deduct the relevant number of mono or stereo modules and add blanks as required. All chassis may be fitted with 2 or 4 dual groups, check your proposed layout with Sound Technology prior to order confirmation - not all mono/stereo/group mixed layouts are possible.

B800

Subject to separate dealership terms

The B800 is a specialised yet highly flexible modular broadcast mixer, drawing on Soundcraft's experience of designing and customising consoles for the broadcast audio market. Modules are connected to internal bussing via motherboard construction, audio connections are via balanced XLRs, and all internal mix busses are balanced to achieve a high degree of isolation, noise and interference rejection, and robust signal handling. Five frame sizes, accepting up to 48 inputs. 8 mono or 4 stereo groups, two fully independent stereo master output modules. 6 mono and 2 stereo aux sends. Extensive monitoring and cue facilities and several sets of speaker and phones outputs. 4 VCA groups. Frame includes PSU. Meterbridge includes cue speaker, talkback XLR and meter selector. Blank panels should be included where necessary to complete the frame/meterbridge space.
