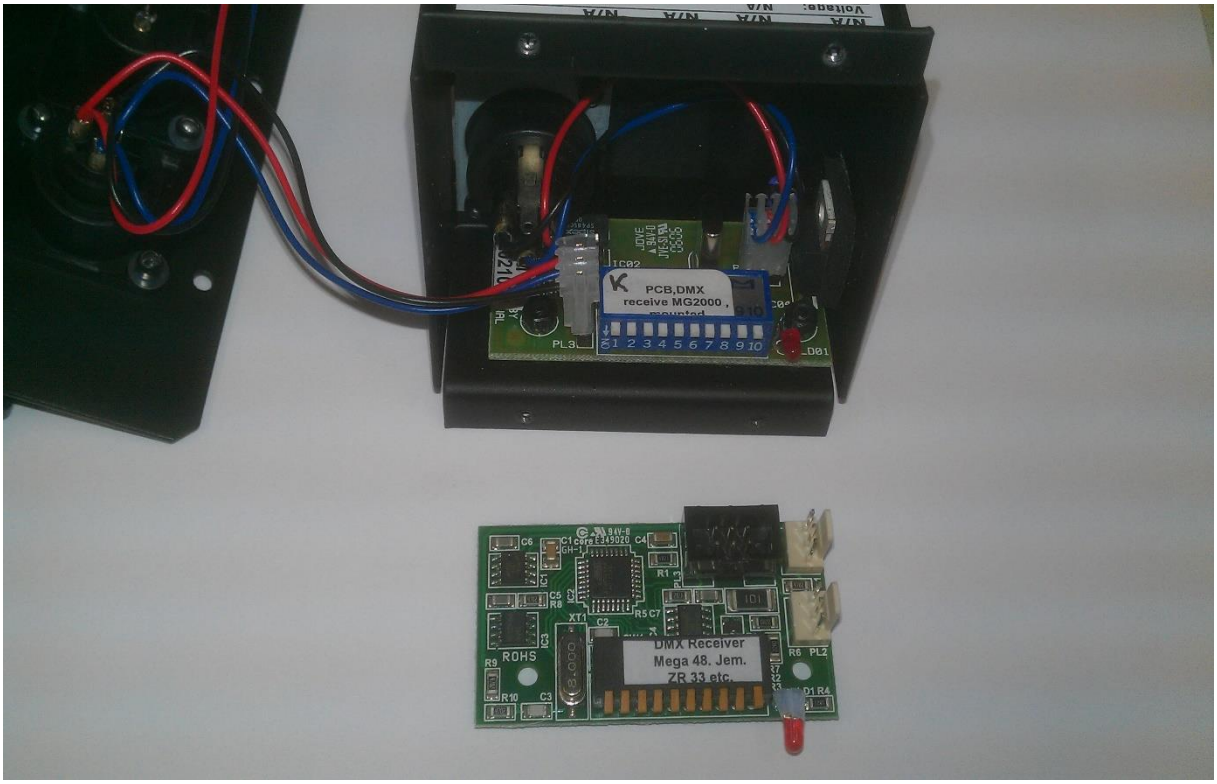
New design DMX PCB

The DMX Interface PCB (62021000) we have been using for the past 12 years has been redesigned for the current market.
It is now a DIGITAL PCB with the ability to change the software using the Epsilon Programmer.
It has been designed as a DIRECT REPLACEMENT in units such as the ZR33, Magnum Club Smoke, AF1 MkI, Magnum 2000 DMX interface, ZR12 DMX interface etc..
It is the same footprint and mounting points BUT the connectors have changed location.
Please refer to the label on the antistatic bag the PCB is supplied in and the photos below:

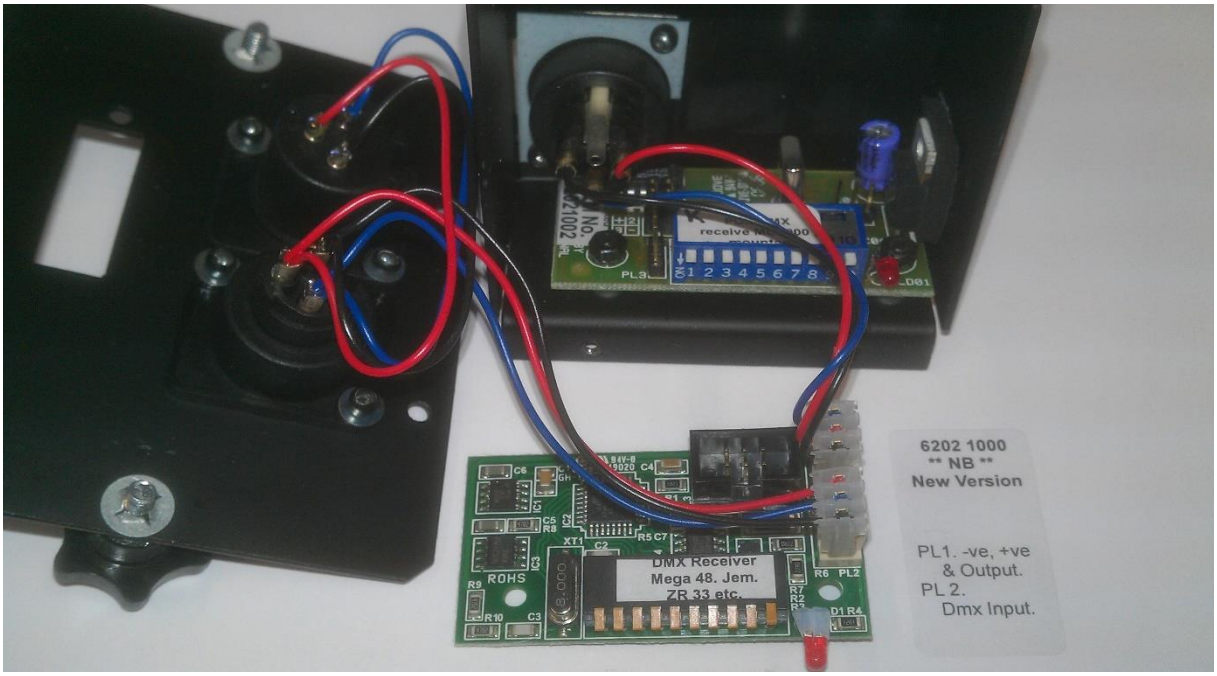
Original connections (Magnum 2000 DMX interface shown) :



New connections:

PL3 moves to PL2.

PL05 goes to PL1.



6202 1000
** NB **
New Version
PL1. -ve, +ve
& Output.
PL 2.
Dmx Input.
DMX Receiver
Mega 48. Jem.
ZR 33 etc.
