MINIFREAK
ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE, PATCH LIST + LICENSE

Congratulations on your purchase of MiniFreak / MiniFreak V Ultimate Patches, one of the best-selling MiniFreak collections. With 250 premium sounds spanning vintage, modern and futuristic, you'll find plenty of musically useful patches for your creations!

Notes

- Patches compatible with MiniFreak V softsynth plugin as well as all MiniFreak hardware synths.
- All patches use only factory samples / wavetables - no custom samples etc. are required.
- Aftertouch and mod wheel are assigned in nearly all of the presets. Macros are not used.
- These patches have a hyphen before the patchname to denote these are Ultimate Patches.
- Join the MiniFreak user community at https://www.facebook.com/groups/294010297925162

Install Requirements

1. A MiniFreak + MiniFreak V, both with firmware 4.0.1+ Or, MiniFreak V only with 4.0.1+.
2. Firmware / software downloads are available at the MiniFreak User Community site: https://www.arturiaminifreak.com/minifreak-downloads.html
3. A PC (Windows 10+) or Mac (OS X 10.13+)

Backup

1. Backup your MiniFreak patches now, as they may be overwritten when you install patches. To learn how to do this, patch management info can be found in the MiniFreak V manual including the **MiniFreak Hardware Preset Management** section.

Installation to MiniFreak V Softsynth Plugin (if you don't own a hardware MiniFreak)

1. Unzip the zip file you received from us, to a folder on your computer.
2. Make sure MiniFreak V is installed and working.
   Continue the installation steps from step 5 on the next page.

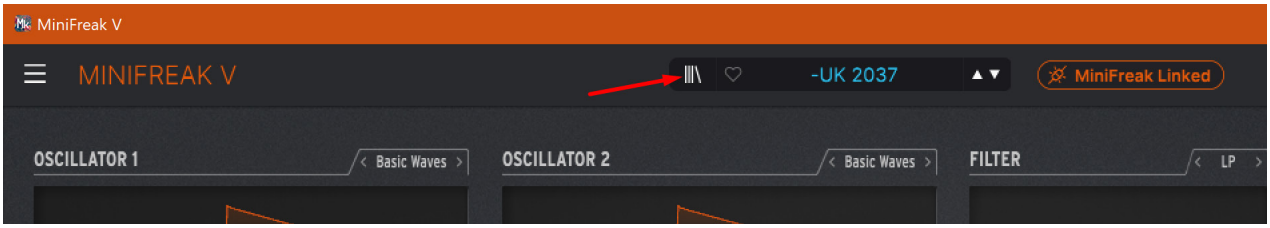

Installation to MiniFreak Hardware

1. Unzip the zip file you received from us, to a folder on your computer.
2. To load the patches into your MiniFreak hardware, you will first load them into the MiniFreak V software using the steps below. (Note MiniFreak V is free with purchase of a MiniFreak).
3. If you own a hardware MiniFreak and don't yet have MiniFreak V installed, download MiniFreak V from your account on the Arturia website. You will first need to register your MiniFreak at https://www.arturia.com/products/hardware-synths/minifreak/start
4. Once you've registered, download MiniFreak V and install. Arturia will provide a link but you can re-download it: arturia.com/myarturia#products — the MiniFreak V manual has more activation and other information if you need it, under **ACTIVATION AND GETTING STARTED**.

PATCHES

Copyright 2025 Ultimate Patches

5. Open MiniFreak V. Click the preset browser icon at the top of the screen:

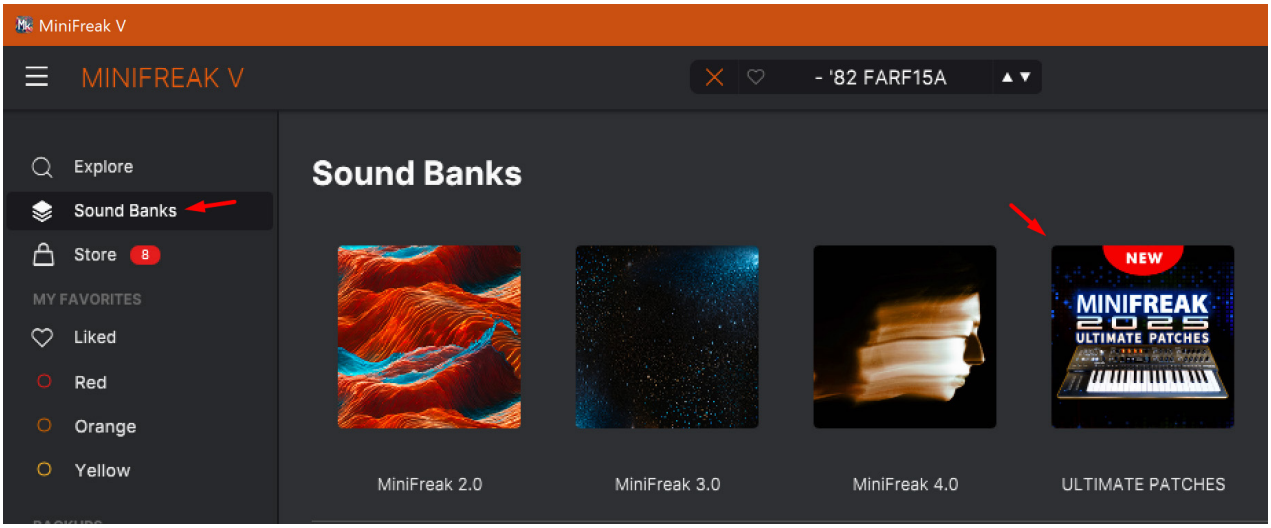

6. Now click on the 3 line icon in the top left corner of MiniFreak V, and select Import:

7. Browse to the folder you created in Step 1. Select the file in that folder (it is named one of the following: ULTIMATE-PATCHES.mnfx, ULTIMATE-PATCHES-VOLUME-1.mnfx, ULTIMATE-PATCHES-VOLUME-1.mnfx or ULTIMATE-PATCHES-TASTER.mnfx) and click OPEN to install. "Presets Imported Successfully" will appear.

8. They are now installed in Sound Banks and if you only have MiniFreak V (not a MiniFreak), you are done installing. Click Sound Banks on the left of the screen, then select the MiniFreak 2025 Ultimate Patches icon to access the patches.

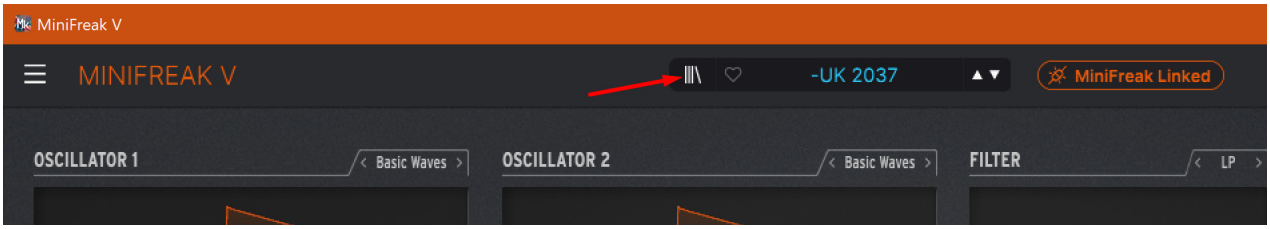

If you have a MiniFreak and wish to install the patches to it, continue to the next steps.

10. Connect the hardware MiniFreak to your computer via USB, and re-open MiniFreak V.

11. Click the preset browser icon at the top of the screen:

The program will now sync with the hardware synth.

12. Select MINIFREAK in the left panel, and the list of patches currently on the synth will appear:

ULTIMATE PATCHES

Copyright 2025 Ultimate Patches

13. You can import an entire volume to your MiniFreak, or a single patch to your MiniFreak. To install only a single patch, skip to step 14. To install an entire bank, do this: In the MiniFreak patchlist that has appeared in the previous step, right click a location (patch slot) where you wish to import the presets to the synth, and select "Import here". Proceed to select the file which is in the folder you created in step 1 (filename will be one of the following: ULTIMATE-PATCHES.mnfx, ULTIMATE-PATCHES-VOLUME-1.mnfx, ULTIMATE-PATCHES-VOLUME-2.mnfx or ULTIMATE-PATCHES-TASTER.mnfx) and import. The entire bank will now load into the MiniFreak starting at the selected patch slot:

14. If you wish to only load a single patch to the MiniFreak, click Sound Banks, select the ULTIMATE PATCHES bank you purchased, and click on a patch - it will temporarily load into the currently selected slot selected on the MiniFreak hardware. Do a patch save procedure (click the orange save knob, etc) if you wish it to save to that slot.

    Enjoy! :)
