The AML-17-020 kit will build a complete PCB which will work if you apply mains power and connect signal to it but there is no form of housing at all

The kit contains **only** the items shown on the left (nothing more);

The following are not included;

Chassis / Faceplate  
PCB standoffs / other hardware  
Knobs  
Mains switch  
Mains connector  
Mains fuse/holder  
Mains wiring  
Audio wiring

You may also find that you need to buy different XLRs from those supplied if using a case made by DDT or Collective Cases
