HYDRASYNTH ULTIMATE PATCHES

FAST 'n' EASY USB INSTALL GUIDE + PATCH LIST

Install Requirements

1. Hydrasynth (any model incl. Keyboard, Desktop, Explorer, and Deluxe)
2. A PC (Windows 7+) or Mac (macOS 10.11+)
3. The free Hydrasynth Patch Manager program from ASM (PC/Mac)

IMPORTANT! When playing the patches, try the mod wheel / aftertouch which are used on over 90% of the patches. Also, if you see our Macros set at 0, try them at 128 for the alternate sounds. In addition, we've included 2 versions of the patches; they are the same except one is for people using common "regular" (mono) aftertouch controllers, and the other is for those using the more rare "poly" aftertouch controllers (Hydrasynth keyboard, Lumi, CME XKey, etc). If you're not sure if your controller has mono or poly aftertouch, chances are it's mono - just install the non-poly aftertouch version. If you own the Hydrasynth keyboard version, install the poly aftertouch version. **NOTE: Patch volumes vary, as we sometimes overdrive the Amp parameter for huge saturated patches. If those patches have too much breakup for your playing style, lower the Amp value (and lose thickness though!)**

INSTALLATION *- If you haven't loaded patches into your Hydrasynth before, here's how to do it:*

4. First, install the free Hydrasynth Patch Manager program (Windows 7+ / macOS 10.11+), and make sure your Hydrasynth is on firmware 1.5.2. or newer. You can do both using Update Pack 1.5.2 (or newer): https://www.ashunsoundmachines.com/downloads

5. Plug in the Hydrasynth via USB to your PC or Mac, turn it on, then start the Hydrasynth Patch Manager. Now's a good time to back up the patches that are currently in your Hydrasynth, before you install your Ultimate Patches. For instuctions on how to do this, read the Patch Manager guide from ASM (included in your download): Hydrasynth_Manager_Quick_Start_Guide_v1.1.4.pdf

6. To install the Ultimate Patches into your Hydrasynth, click "Import" in the Patch Manager, and select the "ULTIMATE PATCHES - VOLUME 1.hydra" (or Vol 2 or 3) you purchased, or for the free Taster Pack: "Ultimate Patches Taster Pack. hydra". Now, in the left section of the Patch Manager window, click the orange arrow, and select the "Packs" dropdown, then select the Ultimate Patches volume you imported.

7. In the right patch area in Patch Manager, click the orange arrow and select the Hydrasynth bank you wish to install the patches into.

8. Now, either use cut and paste, or click on the first patch of the Ultimate Patches patch list, then shift-mouseclick the last Ultimate patch. This will select all the Ultimate Patches in that volume. Now, drag the first Ultimate patch into the first patch slot of the Hydrasynth patch window until you see a red border, then release. After a couple minutes or so, the Volume is loaded in to your synth and you're ready to play. Enjoy!

If you have any questions, feel free to contact us via the contact page on our website **UltimatePatches.com** — we usually respond within a few hours, and usually the same day!

Legal: Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free, and/or resold in any way. The compositions in the sequences and Youtube video demo are copyright protected via their respective owners, and are used in the sequences only for demonstration purposes of the patches. Much of the original music in the Youtube video demo / sequences is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.
