## Eden 410T

**Made in USA**
**Price:** $999
**Type:** Rear ported
**Impedance:** 8Ω (4Ω version available)
**Power rating:** 540 watts RMS
**Frequency response:** 80Hz–13kHz @ ±2dB
**Crossover frequency:** 3.5kHz
**Speakers:** Four 8Ω 150-watt Eden EC1060F 10s; one 1" Eden E2700 cast-aluminum tweeter
**Rear panel:** Two ¼" input/output jacks, one gold-plated banana jack, high-frequency attenuator (OFF–+6dB)

**Dimensions:** 22½"W x 22½"H x 18"D
**Box material:** 7-ply ⅝" void-free sandy
**Weight:** 90 lbs

**CONSTRUCTION:**
**COMPONENTS:**
**PORTABILITY:**
**SOUND:**
**VALUE:**

**Tone Tally:** Balanced, pro tone.
**Bottom Line:** A killer box.

In the late '80s, Eden made the original SWR 4x10 cabinets (the two companies have since parted ways), and the 410T still shows a kinship to the

original Goliath. It has roughly the same dimensions, features a 5" rear-mounted port, and uses the same array of internal baffles. The Eden box also has black-ozite covering, plastic stack-lock corners, 1" internal batting, and 18-gauge wiring. There's a thermistor bulb to protect the tweeter, a feature we love—when you exceed the tweeter's voltage limit, the bulb lights up (which you can see through the speaker's surrounds), giving you a visual cue that you're pushing the tweeter to its max. It also has the most comfortable deep-dish handles of the lot. And casters, too!

The 410T has its own sound, one that's tight and muscular; the top end isn't as "audiophile" as the SWR's, but some testers found this sweetness more appealing. Comments: "That's a loud cabinet!" "Has bottom without sacrificing clarity." "Best across the whole spectrum."
