Pultec EQP-1a Kit

RecProAudio Pultec EQP-1a Reproduction and Kit Pricing:

DIY Pultec EQ KIT: \$1545

This is a point to point EQ Kit (not PCB).

(Note: EQ kits are not intended for beginners.)

RPA Pultec Kits are comprised of only the finest parts available and include everything needed to assemble an EQP-1a clone:

Sowter input, interstage and output transformers

Hammond universal power transformer (120/220/240v)

Cinomag inductor (and mounting flange)

Complete audio-grade filter capacitor set (custom made for RecPro Audio)

Neutrik jacks, Carling switches, PEC pots, Grayhill switches, Nichicon and Sprague electrolytics

Heavy-duty painted case

Painted and engraved front panel
Machined rear (engraved) and bottom panels (absolutely no drilling required)
VOS knobs (including Daka-Ware)
NOS tube sockets
NOS (or testing very strong) RCA 6X4, 12AU7 and 12AX7 vacuum tubes (balanced)
Signal/Buss/Heater wire and all hardware (washers, stand-offs, grommets, stainless steel screws and nuts)

Support:

Over 500 high-resolution, step-by-step, assembly photos via FTP
All new master wiring diagram and switch layouts
Schematics, transformer and inductor datasheets, manual documentation included
Email and/or telephone tech support

RecProAudio *Completely Assembled* Pultec EQ KIT: \$2545

Completely assembled RPA EQP-1a kit, hand-wired by Ron (cayocosta), point-to-point, tested, ready to use.
(Matching available at no charge for pair orders.)

More information is available at [RecProAudio's Original Pultec Page](#)

"These things are dead quiet and about as transparent as can be "in" or "out". I just wanted to compliment you on a very well thought out kit. It was very complete and made assembly quite a joy." - A.G.

Rhythm guitars are a Strat through a RecPro Audio Valve DI. Solo guitars are a Gibson 335 and Tweed Deluxe. Fender Jazz Bass through RecPro Audio Valve DI. Pultec EQ is on all guitars. 2 Mix was sent through a pair of Pultecs adding some 100hz and 12k.

 [mister seven](#)

Everything on this track is in the box except for the acoustic guitars, electric guitars and bass. On acoustics, some 8k was added with lows rolled off a bit. For electrics, a heavy 10k boost was applied. For bass, 5k was cut while boosting and cutting 20hz each about mid-way. Bass was hit hard through an old Ashly SC-50 limiter, as were the acoustic and electric guitars through an La2a. Redd 47 preamp on acoustics, La2a as preamp on electrics; bass guitar was though RecPro Audio Valve DI.

 [lq-soundcheck](#)

This is a quick, one-take Martin acoustic fingerstyle bit with a little reverb and a shaker. One guitar, 2 mics, a little EQ on the top end.

 [1975](#)

Guitar Rock. EQP-1a on all guitars for tone shaping.
