Rocket Network 2.5
Instructions for Download, Installation and Login

Checklist
To collaborate on Rocket Network, you need three pieces of software

- A RocketPower™ audio application*
- RocketControl
- A web browser

If you already use an audio application, you must verify that it supports RocketPower™. (We will help you do this.)
If you don't have an audio application that supports RocketPower™, you can download one for free.

Before proceeding, ensure that your computer's configuration meets the minimum system requirements:

MINIMUM SYSTEM REQUIREMENTS: Windows
• 200MHz Pentium processor
• Microsoft Windows 98 ME / 2000
• 128 MB RAM
• Microsoft Internet Explorer 5 or Netscape Communicator 4.7 or higher*
• 10 MB hard disk space
• Screen Resolution: 800x600, 1024x768 or higher recommended
• Access to the Internet

MINIMUM SYSTEM REQUIREMENTS: Macintosh
• 200MHz 604e PowerPC processor
• Mac OS 8.6 or higher
• 128 MB RAM
• Microsoft Internet Explorer 5 or Netscape Communicator 4.7*
• 10 MB hard disk space
• Screen Resolution: 832x624, 1024x768 or higher recommended
• Access to the Internet

NOTE: *Netscape 6 in NOT compatible with Rocket Network*

Verify Your Audio Application
There are two options, depending on your requirements:

If you:	**Already have an audio application**	**Need an audio application**
You'll need to:	Ensure you have a version that supports RocketPower™	Choose a FREE RocketPower™ application
We will:	Provide you with a link to the manufacturer's website where you can download any necessary updates to your application	Take you to the manufacturer's website where you can download the application

Install or Update Your Audio Application

If you need to update your audio application, you should do this before proceeding to the next step. (Restart your computer if necessary)
If you downloaded a free audio application, install it before proceeding to the next step. (Restart your computer if necessary)

Download and Install RocketControl

Once you have a valid RocketPower™ audio application installed, download and install RocketControl.
If you already have RocketControl 2.3 installed on your machine, DO NOT uninstall or delete the application. Simply, perform the 2.5 installation.
If prompted, restart your computer.

Login

There are two ways to login to the network:

1. Session Collaboration Mode

Login through your RocketPower™ audio application to collaborate and chat with other users in a Session:

- Launch your RocketPower™ audio application
- Enable RocketPower

2. Web-Only Mode

Login using just your web-browser. You will be able to listen to mixes, manage your account and manage your online sessions but you will be unable to collaborate until you enable RocketPower™ from your audio application.
To login with web-only,

Use this URL:
https://prod.rocketnetwork.com/main/index?view=login&template=login.html

We recommend that you bookmark the web-login page for future reference.

Support

If you encounter difficulty with any aspect of registration, download, installation or login, please contact Technical Support department at:
