Installation Procedure

1. Install USB Driver* --> double click on 'CDM21218_Setup.exe'.

   * If you have previously installed the driver (when installing previous version of the software, or other software from GFI System) then this step may be skipped.

2. Install the SpecLab software --> double click on *'Setup.exe*'.

   At one point, you may be prompted to download and install the "Visual C++ 14 Run-time Libraries".

Proceed to download and install by clickling the “Install” button. After a while your computer will reboot or you may be prompter to reboot your computer. When the computer reboots, run *Setup.exe* again to complete the installation process.

After completing the above steps you are ready to connect Specular Tempus to your computer. Enjoy!
