How To Load SysEx Banks From a DS-8 from a PC

1) Turn on your DS-8

2) Go to Functions Mode

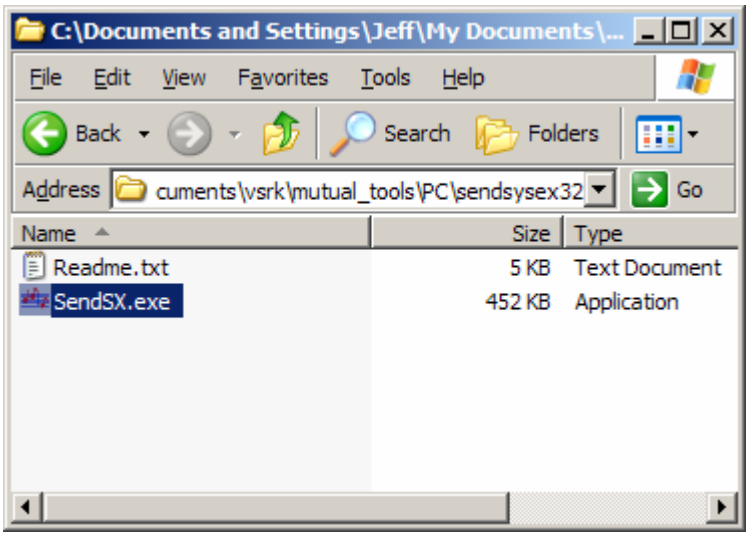

3) Turn off internal memory protection (4)

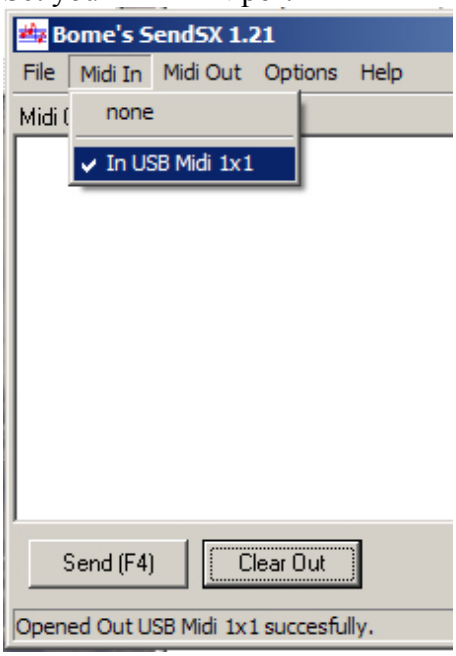

4) Turn on System Exclusive (8)

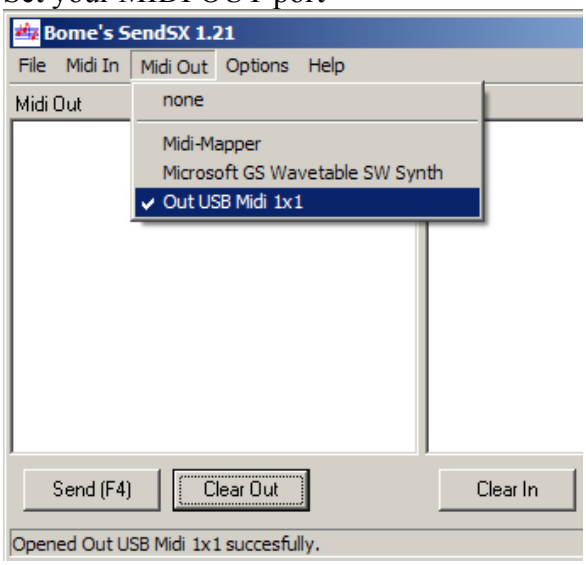

5) Launch SendSX.exe

6) Set your MIDI IN port

7) Set your MIDI OUT port

8) Go to SysEx Transfer Mode (9)

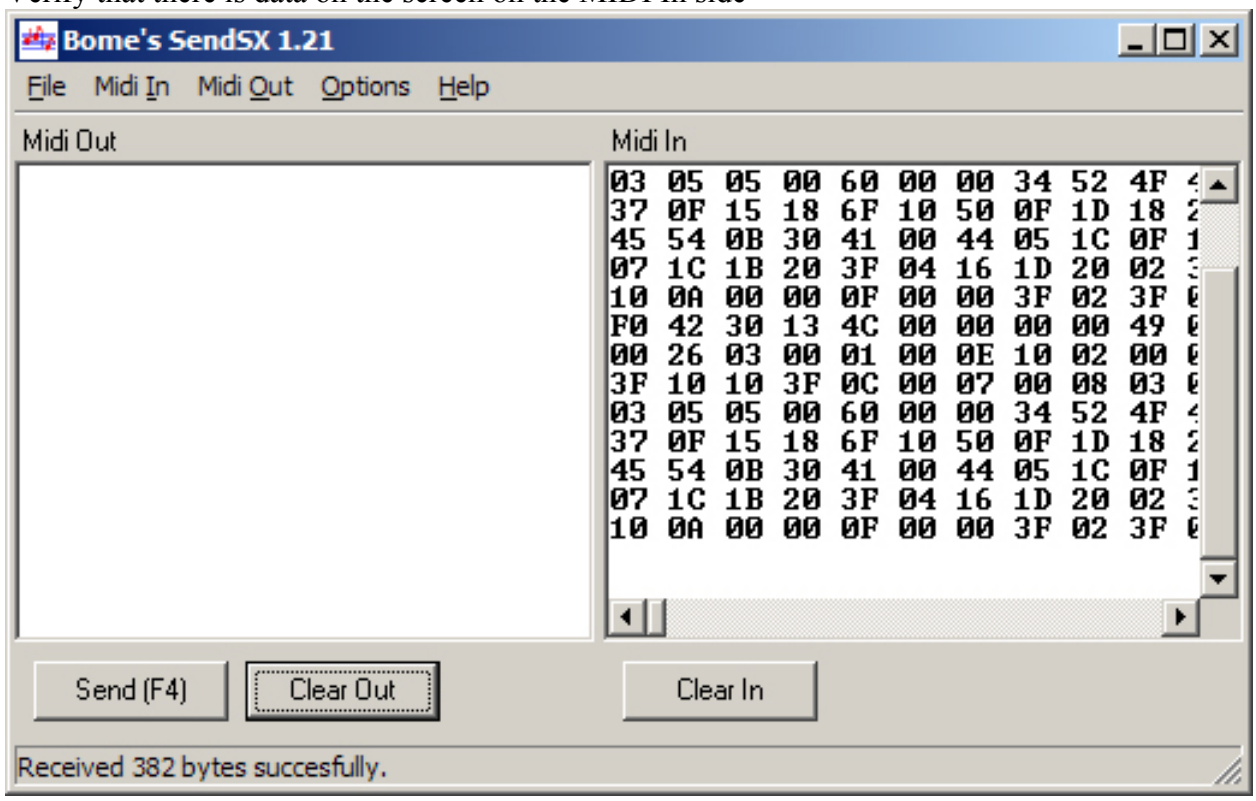

9) Initiate transfer by hitting the Yes/Up button

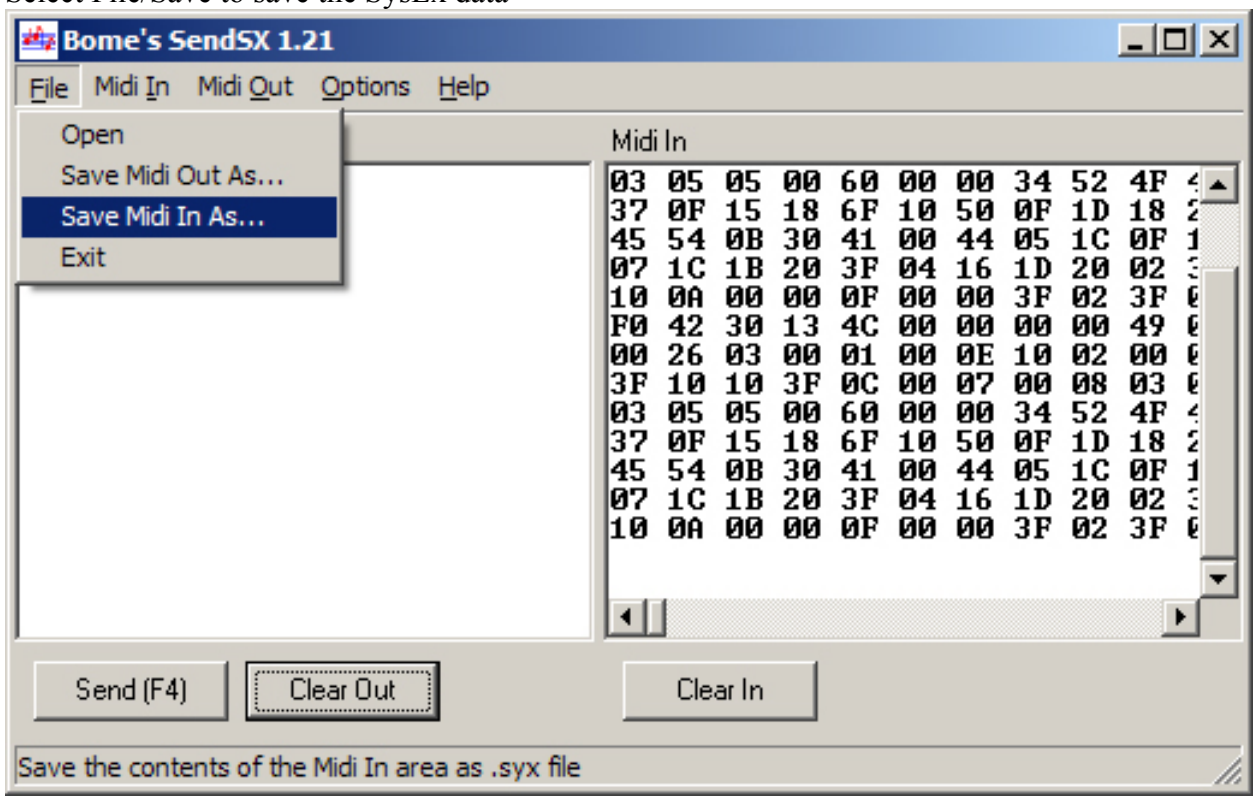

10) Watch the data transfer execute

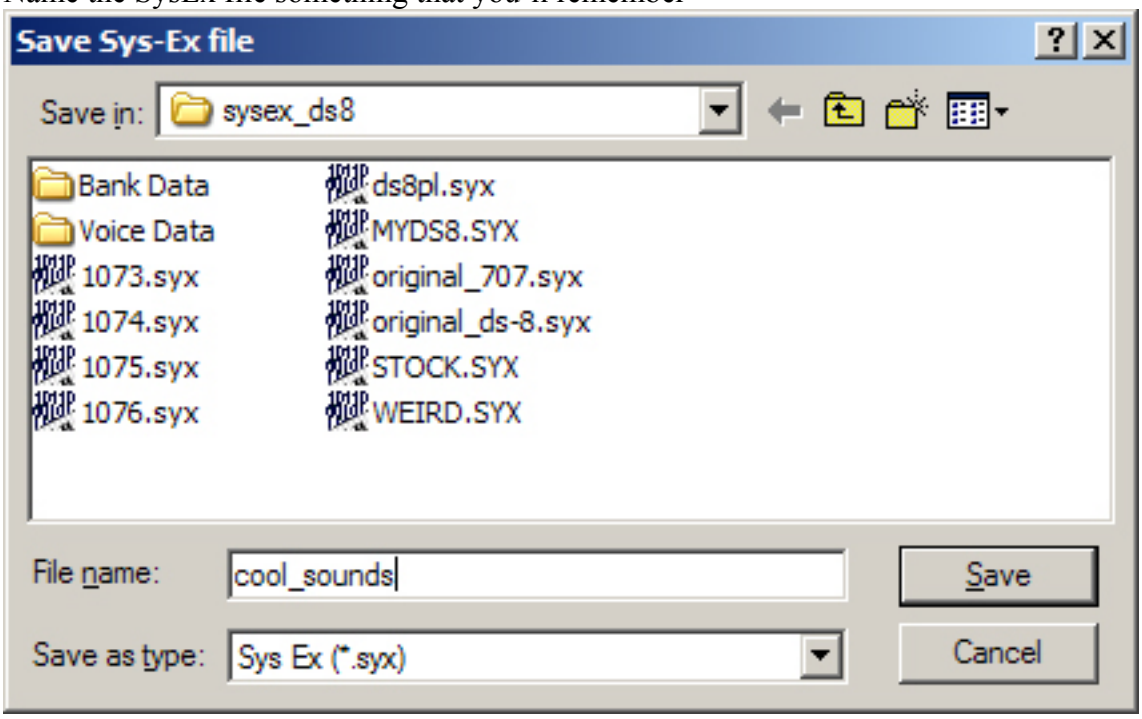

11) Verify that there is data on the screen on the MIDI In side

12) Select File/Save to save the SysEx data

13) Name the SysEx file something that you'll remember

14) Select a new patch number to verify that the transfer worked
