CLEAR THE STAGE

The CE-25, the latest in a new generation of FM sound-synthesis from Yamaha.

Compact, lightweight and fully portable, the CE-25 incorporates 20 polyphonic voices that have all the vibrance, sensitivity and beauty of their acoustic counterparts. For this, thank two important innovations.

Yamaha's unique FM Digital tone generation technology now makes it possible to synthesize exactly the same type of random wave-form structures — constantly changing throughout each note — found in acoustic voices. Couple this to a touch-responsive keyboard with fully adjustable Tone-Initial, Tone-After and Vibrato-After controls, and the CE-25 offers, like its primarily monophonic brother the CE-20, a depth and authenticity of dynamic expression that is an unprecedented godsend for the creative musician.

Opposed to existing portable systems, the CE-25 opens up a whole new world of subtle realism, at the same time literally clearing the stage of the many bulky keyboards previously required to supply such a range of sounds and expressive capability.

The Yamaha CE-25. Let your ears convince you!

Specifications
49 Keys (C2 - C6)
8-note polyphonic
Polyphonic Voice Selectors: Brass (Multi)5; Strings 3, Organ 2; Polylead 2; Polybass 2; Percussive 6.
Effects: Touch sensitivity (Initial/After), Vibrato, Symphonic, Brilliance.
Performance Controls: Pitch, Sustain, Expression Volume, Vibrato Depth.
Standard Accessories: Expression Pedal; Footswitch.
